MODULAR DATACENTRES

## Data Centre Decisions That Matter

Is your infrastructure ready for what's next?

*These are the questions shaping resilient, future-proofed environments:*

- **AI-Ready or Outdated?** - Is your current Data Centre built to support AI workloads, or falling behind?
- **On-prem, Cloud or Hybrid** - Which strategy delivers the best value, control, and scalability for your organisation?
- **Cost vs. Value** - Are you capturing the full bottom-line benefits of compute and AI investment?
- **Location Matters** - Is your data positioned to reduce latency, energy waste, and operational cost?
- **Power and sustainability** - Are you meeting net-zero goals, or just ticking boxes?
- **Future Compute Needs** - Who's tracking your 5+ year compute roadmap, and is it aligned across teams?
- **Disaster recovery** - Is your DR strategy current, tested, and truly resilient?
- **Operational Risk & Accountability** - Are roles, risks, and stakeholder commitments clearly defined and actively managed?

**Mavin Strategic Consultancy** helps organisations cut through complexity, plan with clarity, and build AI-ready, sustainable infrastructure.

***Independent Thinking. Trusted Advice.***  
***Unbiased guidance built on experience not agendas.***

## **Mavin Strategic Consultancy Portfolio**

- **Strategic Pre-Design Advisory** - Early guidance to align vision, priorities, and regulatory context.
- **Requirements Definition** - Turning business and technical needs into clear design parameters.
- **Feasibility Modelling & Reporting** - Assessing technical, financial, and operational viability.
- **Geo-Site & Infrastructure Readiness** - Evaluating power, connectivity, planning, and build ability.
- **Market Intelligence & Deployment Viability** - Insight on demand, competition, and positioning.
- **RIBA-Aligned Design Development** - Structured progression through RIBA stages, tailored to data centres.
- **Sovereign Data Governance & Risk** - Reviewing compliance and jurisdictional risks.
- **Cyber Resilience & Threat Modelling** - Layered defence and proactive mitigation strategies.
- **Stakeholder Engagement** - Alignment and advocacy across C-suite and investors.
- **ITT Structuring & Bid Preparation** - Robust, outcome-focused tender packages with vendor neutrality.

**Shape your next project with confidence.**
